

Summer Research Assistantship (25%, two months)

Scoping review of Sampling Techniques for Big Qual Research

Review of applicants will begin immediately. Please apply by June 1 for strongest consideration.

Start Date: Thursday, June 16, 2022

In this project, we are exploring how the breadth-and-depth model of “Big Qual” Analysis (<http://bigqlr.ncrm.ac.uk/about-the-project/breadth-and-depth/>) can be applied to web archives datasets. The research assistant will help conduct a scoping review of sampling techniques and assist in developing a proposal for which techniques to apply for analysis of a large-scale web archives collection.

This is a 25% appointment for two summer months (June & July).

Tasks of the research assistant include:

- Conducting literature searches and reviews on sampling techniques for textual analysis and image classification.
- Read and discuss relevant research literature.
- Other research duties as assigned, including proofreading, bibliographic management.

Approx. 80% of the time will be working independently, and 20% of the time in meetings with Professor Maemura.

Students will be paid according to current iSchool assistantship rates. Contact hiring faculty member for specifics.

To apply for this position, please email a resume and cover letter to Dr. Emily Maemura (emaemura@illinois.edu).
