

School of Information Sciences

Graduate Hourly Graders

The iSchool at Illinois leads the way in shaping the future of information. This success is the result of a commitment to research, education, and engagement and a long history of innovation. Our School consistently earns recognition as one of the best destinations—both on campus and online—for graduate studies in the information sciences. The School of Information Sciences and the University of Illinois at Urbana-Champaign are known for innovative research and teaching that address global problems and improve the human experience. Students enjoy a wealth of resources, including cutting-edge research laboratories, superb library collections, and rich cultural programs.

The iSchool is hiring several graduate students to act as graders (with other fringe responsibilities) for the Summer course IS 532/CS 513 Theory & Practice of Data Cleaning. As such, they must demonstrate a high level of professionalism and have excellent written communication skills. Duties include:

- Attending Piazza forum and online office hours (as needed)
- Grading final project in August (bulk of responsibility)
- Fluctuating hours per supervision of instructor

Qualifications

The applicant should have:

- Completion of IS 532/CS 513 (strongly desired)
- Completion of coursework in Data Curation
- Completion of coursework in Databases

To apply, please send an email expressing interest with cover letter, resume, and two references (faculty or employers) to Dustin Janes at djanes3@illinois.edu. Please use the subject line "Information Sciences Grad Hourly (Your Name)". Applications will be accepted until the positions are filled.
